

Drilling and Bagging French Hotdog baguettes

DRILLING AND BAGGING

DRILLING AND BAGGING OF FRENCH HOTDOG BAGUETTES

Danmatic's Drilling machine is the best choice when it comes to processing and packing of French Hotdog baguettes.

We have more than 20 years of experience in this field, and are today the leading supplier of processing equipment for handling, shortening and drilling of baguettes. We also provide various automatic packaging solutions for the finished product.

The process starts after freezing, where we either semi- or fully automatic load the baguettes into a special designed pocket conveyor. The baguettes are hereafter shortened and drilled in a fully automatic process and carried in measured portions to the packaging equipment.

Waste from the process is collected and transported from the line, for further processing

BENEFITS

- Can be integrated into existing lines
- Maintenance reduced to a minimum
- The equipment is designed for production 24/7
- More than 20 years of experience are integrated into the equipment

OPTIONS

- Automatic handling
- Packing solutions for both retail as well as catering markets

TECHNICAL DATA

- Capacities from 3.000 up to 24.000 pcs/h
- Delivered with proprietary cutting saw and servo controlled drilling equipment
- Manufactured in stainless steel an food approved materials
