

HORIZONTAL SWITCH

HORIZONTAL SWITCH

DISTRIBUTION AND SORTING OF PRODUCTS

Danmatic's Horizontal Switch is ideal for distributing and sorting products from one production line to several lines as well as to other production equipment.

The control unit enables the distribution of products either in a randomly or predefined pattern.

It is possible to let the control unit of the Packaging Machine distribute the products coming from the Horizontal Switch.

The construction of the Horizontal Switch secures a constant and reliable flow throughout the production.

BENEFITS

- Easy to incorporate in existing lines
- Online access of control unit for existing equipment

OPTIONS

- Available for distribution to more than two lines
- Customer adapted solutions are available

TECHNICAL DATA

- Operated with its own PLC-control
- Delivered with self contained control unit
- Manufactured in stainless steel and food approved materials
