

SEEDING UNIT DU300-1300

SEEDING UNIT DU300-1300

SEEDING UNIT DU300-1300

Is a complete Stand Alone Unit for decoration including automatic hopper filling. It is specially designed for gentle handling of toppings such as; sesame, poppy seeds etc.

The seeding hopper is a separate unit, and can easily be replaced when changing topping. A Flex-coupling on the backside will ensure a quick replacement of the hopper without the use of tools. Change over time is less than one minute.

The vacuum conveyor automatically refills the seeding hopper. The Seeding Unit DU1300 is equipped with an auger spiral underneath the vacuum conveyor, levelling the topping in full length of the seeding hopper.

BENEFITS

- Useable for most types of toppings
- Very gentle handling of the toppings
- Adjustable seeding width
- Quick replacement of the seeding hopper
- Quick disassembly without the use of tools

OPTIONS

- Extra seeding hoppers
- Different screens suitable for different type of topping
- When using toppings that may clog up, an agitator can be fitted in the hopper
- Automatic product detection; only topping, when needed
- Height adjustable framework
- Mobile storage trolley for extra seeding hoppers
- The best result will be achieved, when combined with Danmatic's Décor Unit VV 300-3000 for moisturizing the products

TECHNICAL DATA

- Available in seeding widths from 300 to 1300 mm
- Mobile unit operated via its own PLC-control
- Manufactured in stainless steel and food approved materials
- The vacuum conveyor is ATEX approved
